

Network Contollers with 50 Watt Amplifiers

Shipping March 2012

Brief Description

Consisting of two units Server and Multiple Slave units. Extremely easy to install as the Master (The Server) “daisy chains” to each and susequent Slaves or Zones, eliminating the need to connect each unit to a router.

The Master Controller (Server) supports multiple slaves. Each Slave (Zone) supports

USB

Headphone

Microphone

Contact Closure

The USB Host can be used for

USB-Bluetooth

USB-WI-FI in both cases using a separate module

These unit will be of particular interest to Educational Facilities as the units can also be used for Voice Amplication, Remote Diagnostics and operations using any Cell Phone.
