

# POLE MOUNT PLATFORM

Part # NB-PMP

Patent Applied For

DESIGN

*The first Platform designed to hold all the Equipment used above a Projector.  
For Installers, the first Product that also hides all the Cables from view*

This versatile 10.5 wide 9.5" deep Platform is designed to accommodate many different pieces of equipment, including, but not limited to Nigel B Amplifiers, Crestron, AMX, Aurora Multimedia Controllers and Versa Tools from Extron, are just some of the Manufacturers whose products fit perfectly.

## CABLE MANAGEMENT

All Cables run **INSIDE** the Projector Pipe without modification to the Pipe. Not only is it now easier to hide all the Cables from View, it also makes the entire Installation tidier as it eliminates the need to tie wrap everything outside the Pole.
