

POLE MOUNT PLATFORM

With Built In Three Outlet Power Panel

*The only Platform designed to hold all the Equipment used above a Projector.
For Installers, the first Product that also hides all the Cables from view*

This versatile 10.5 wide 9.5" deep Platform is designed to accommodate many different pieces of equipment, including, but not limited to, Nigel B Amplifiers, Crestron® QM-RMCRX-BA, QM-RMC, AMX® NI 700 / NI 900 Series, Aurora Multimedia® WACI Controllers and Versa Tools from Extron®.

These are just some of the Manufacturers whose products fit perfectly.

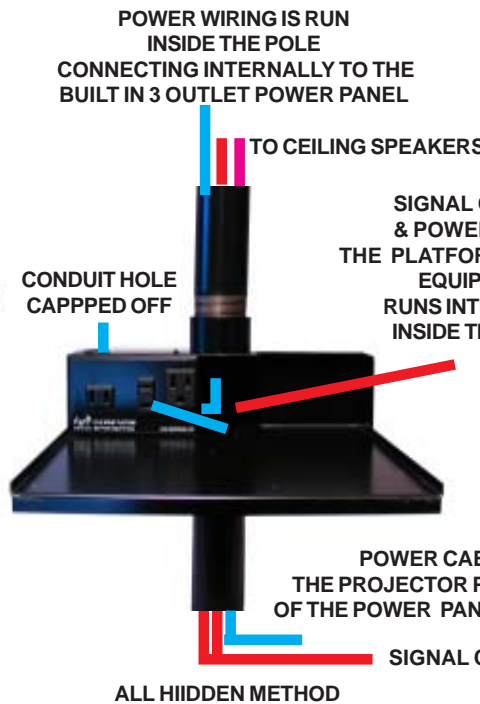

CABLE MANAGEMENT

All Cables are normally run INSIDE the Projector Pole without modification to the Pole itself. Not only is it now easier to hide all the Cables from view, it also makes the entire Installation tidier as it eliminates the need to tie wrap everything outside the Pole.

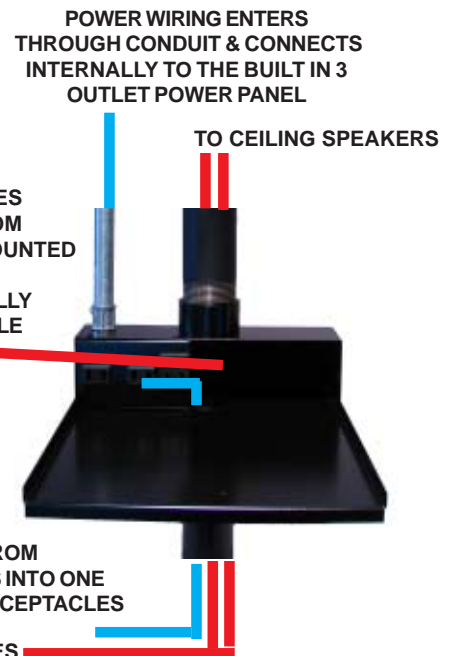

CONDUIT HOLE CAPPED OFF

ALL HIDDEN METHOD
