

PROJECTOR POLE MOUNT- WALL BRACKET

Patent applied for

This One Bracket can be used for many different installations, regardless of the Projector Mount being used

Designed for all of our Amplifiers and Power Supplies, it's 5 1/2" square base also makes it perfect for many other products

The underside view shows the many different pre-drilled hole patterns that allow any device to be installed including all Extron® Versa® Tools

Made of Aluminum the Bracket can be easily be custom drilled for other similar sized equipment including AMX® and Cresron's ® Room Controllers.

The Universal Mounting Bracket can also be attached to any Flat Surface or any Projector's Pole regardless of the Mount's Manufacturer

ONLY TWO INCHES HIGH NEEDED ON A TYPICAL INSTALLTION

Each Bracket is secured to the Projector's Pole using a Simple "U" Bolt (which we supply). When using two Brackets "side by side" to install both the Amplifier and Power Supply, the Projector can sit as close as two inches from the Ceiling. This reduction in height is achieved by using two sets of offset Bracket holes, keeping the two Brackets on the same plane.

Supplied "U" Bolt on Pole

EXAMPLES SHOWING HOW THE UNIVERSAL BRACKET CAN BE USED

Each Bracket comes with it's own U Bolt for standard 1 1/2" Diameter Pipe that is supplied with a Projector Mount.

All our Amplifiers

Crestron® QM-RMC

Extron® Versa Tool Module

Two Brackets on Pole

Amplifier & Power Supply

Nigel B's Gyromount Adapter fitted to Premier Mount's Gyromount

Nigel B's Gyromount Adapter is used when attaching the Universal Bracket to the Premier Mount Gyromount

Universal Bracket can also be attached to any Flat Surface

Bracket & Adaptor on Gyromount

For Plenum Rated or Concealed Ceiling Installations see our new Plenum Equipment Box that conceals everything including the Power & Cables for the Projector, Amplifier and Speakers inside the Box & Support Pipes
